

Joey Capps

Computer Science Graduate Student

(206) 930-6019 | joeylcapps@gmail.com | github.com/caJoey | linkedin.com/in/joey-capps/

Education

Washington State University

May 2027 | Pullman, WA

M.S Computer Science - Mahmoud Dillsi Graduate Fellowship

GPA: 4.0 / 4.0

Relevant coursework: Algorithms, ML, AI, Advanced Programming Languages

Western Washington University

December 2024 | Bellingham, WA

B.S Computer Science

Relevant coursework: Operating Systems, Object Oriented Design, Databases, Machine Learning

Work Experience

Software Development Engineer - Amazon Web Services

May 2026 - August 2026 | Seattle, WA

- Will be joining the Elastic Block Store (EBS) team this summer for an SDE internship at AWS.

Founding Software Engineer - Early-stage educational platform startup

May 2025 - May 2026 | Remote

- Built a subscription-based educational platform that allows people to create / share modularized courses.
 - Leading backend system architecture and development using **PostgreSQL**, **Node.js**, **Express.js**, **Socket.IO**, **React**, **RESTful API**, **HTTP**, and hosted in the cloud with **Azure**.
 - Implemented interactive frontend using **React** and **TailwindCSS**.
 - Achieved 80%+ test coverage for backend services using **Vitest**, **Supertest**, and ephemeral **Dockerized PostgreSQL** instances to ensure reliability, and integrated into a **CI/CD** pipeline via **GitHub Actions**.
 - Authored technical documentation and grew the engineering team to 3 developers.
-

Involvement

WWU Competitive Programming Club

September 2022 – December 2024 | Bellingham, WA

- Placed 3rd in Washington / 34rd in the PNW at ICPC 2024 division 1 during the Fall 2024 quarter using **Python**, the first D1 medal in WWU history and the best WWU ICPC result since 2004.
 - Placed 1st in Washington / 5th in the Pacific Northwest at the ICPC PNW 2022 division 2 during Winter 2023 quarter using **Java**.
-

Notable Projects

Fog of War Chess

February 2026 – May 2026

- Built a 5x5 “Fog of War” chess frontend that allows clients to play an imperfect-information chess variant against a variety of custom AI agents.
- Used **Flask**, **React**, and **Socket.IO** to allow real-time updates to the dynamically rendered board as moves are made.

Covid Memories

January 2024 – December 2024

- Developed a website showcasing an audio library of interviews about the COVID-19 pandemic, using **Node.js**, **Express.js**, **MongoDB**, and **Azure**.
- Collaborated in a team of four, contributing to both backend and frontend development, maintaining / refactoring code, and actively participating in weekly meetings.

Poker Online

January 2025 – April 2025

- Developed a website for playing real-time Texas Hold’Em poker Sit & Go games with fake money, using **Node.js**, **React**, **Socket.IO**, and **Express.js**.
-

Languages and Frameworks

Python, HTML, CSS, JavaScript, Node.js, React, SQL, Azure, C, Java
